

CHILDMINDING IRELAND
Supporting Ireland's Childminders; Minding Ireland's Children

Covid-19 Infection Control Policy for childminders in line with [HPSC guidance](#)

The public health guidance is based on two key principles:

- That services should take steps to ensure individuals with symptoms do not enter the service, and
- That services should take steps to reduce the chance of spread of the virus in case an infectious person, without symptoms, enters the building.

Standard infection prevention and control procedures in my home are always important but even more so in a pandemic situation. A heightened awareness by myself, parents and children (where age appropriate) is required so that we know how to protect each other and how to recognise and report symptoms of COVID-19 infection.

As COVID-19 is a new illness, we are still learning about how easily the virus spreads from person to person and how to control it, so it is important to keep informed and make sure you are using the most up to date guidance available. This information is available from the following links:

- HSE-HPSC: <https://www.hpsc.ie/a-z/respiratory/coronavirus/novelcoronavirus/>
- HSE Hub: <https://www2.hse.ie/coronavirus/>
- Department of Health: <https://www.gov.ie/en/news/7e0924-latest-updates-on-covid-19-Coronavirus/>

COVID-19 can be a mild or severe illness. Severe illness is much more common in older people (especially older than 70) and in people vulnerable for other reasons. Severe illness is much less common in children and young adults in good health. [Symptoms](#) include fever (high temperature), cough, shortness of breath, difficulty breathing.

In my childminding home I will do the following to reduce the risk of COVID-19 spread

1. If I have symptoms, my service will not operate and no children will attend. If a member of my household has symptoms, my service will not operate and no children will attend.
2. There will be greater attention to hand hygiene, respiratory hygiene and cleaning.
3. I will limit contact between people, by having a Welcome Back area, for drop off/settling in and collection in an outdoor space. Drop off and Collection times will be staggered to avoid overlap, if a parent arrives at the same time as another family, one family should remain in the car until the other parent has left.
4. I will raise awareness by sharing information on Covid-19 and of the symptoms, with parents and children.

5. I will make sure that all parental information is communicated electronically to avoid long conversations at greeting time or home time.
6. I will not work if I or any member of my household are ill or identified as a close contact and will follow HSE guidance on self-isolation.
7. I will advise parents not to present their children for childcare if the child has symptoms of a viral respiratory infection or if there is someone in the household suspected or known to have COVID-19.
8. I will promote good hand and respiratory hygiene as described below and display posters.
9. I will promote good respiratory hygiene by:

Encouraging the children and ensuring that I cover our mouths and noses with a clean tissue when we cough and sneeze and then promptly dispose of the tissue in a bin and wash our hands. If we do not have a tissue, we will cough or sneeze into the bend of our elbows instead, not into our hands.

[Posters on preventing spread of infection are available on the HPSC website.](#)

10. I will promote good hand hygiene, by:
 - washing our hands regularly.
 - washing our hands with soap and running water when hands are visibly dirty. If our hands are not visibly dirty, we will wash them with soap and water or use a hand sanitiser.

We will wash our hands:

- before and after we prepare food
- before eating
- before and after caring for sick individuals
- after coughing or sneezing
- when hands are dirty
- after using the toilet
- after changing a nappy
- after handling animals or animal waste

We will follow the HSE hand hygiene guidance at <https://www2.hse.ie/wellbeing/how-to-wash-your-hands.html>

11. I will restrict any unnecessary visitors to my home during childminding hours. Where it is considered necessary for a parent or guardian to enter my home, e.g. to help settle in a new child, social distancing between the parent/guardian and other adults will be observed. I will keep a record of anyone in my home on each day to facilitate Contact Tracing in the event of an episode of infection.
12. I will use a cloth face covering in enclosed indoor settings where it is not possible to keep a distance of 2 metres from others, when not caring for children.

13. I will not observe physical distancing measures with the children in my care, but I will try to maintain physical distancing from parents as far as possible.

14. Hygiene measures and cleaning regimes:

- Where possible I will teach children how to clean their hands and about respiratory hygiene.
- Tissues and hand sanitisers / hand gel will be available at all times and will provide bins for disposal of tissues.
- I will ensure hand-washing facilities, including soap and clean towels/disposable towels, are well maintained.

15. I will increase the frequency and extent of cleaning regimes and ensure that they include:

- clean regularly touched objects and surfaces using a household cleaning product
- paying particular attention to high-contact areas
- wear rubber gloves when cleaning surfaces, wash the gloves while still wearing them, then wash my hands after I take them off.

16. I will select and manage toys from an infection prevention viewpoint, by:

- choosing toys that are easy to clean and disinfect (when necessary) and dry.
- choosing puzzles and toys, that children are inclined to put in their mouth, that are capable of being washed and disinfected.
- discouraging children from putting shared toys into their mouths.
- storing clean toys/equipment in a clean container or clean cupboard.
- always following the manufacturer's cleaning instructions.
- always washing my hands after handling contaminated toys and equipment.

17. I will clean toys in the following way:

- All toys (including those not currently in use) will be cleaned on a regular basis, i.e. weekly. This will remove dust and dirt that can harbour germs.
- Toys that are used by very young children will be washed daily.
- Toys that children put in their mouths will be washed after use or before use by another child.
- All toys that are visibly dirty or contaminated with blood or body fluids will be taken out of use immediately for cleaning or disposal. Toys waiting to be cleaned must be stored separately.

Cleaning Procedure as per current [HPSC guidelines](#),

- Toys will be washed in warm soapy water, using a brush to get into crevices.
- Toys will be rinsed in clean water and thoroughly dried
- Hard plastic toys if suitable will be cleaned in the dishwasher.
- Toys that cannot be immersed in water i.e. electronic or wind up should be wiped with a clean damp cloth and dried.

Disinfection procedure

- In some situations, toys/equipment may need to be disinfected following cleaning. For example:
 - Toys/equipment that children will place in their mouths.
 - Toys/equipment that have been soiled with blood or body fluids.

During an outbreak of infection:

If disinfection is required:

- Use a chlorine based disinfectant at a concentration of 1,000ppm available chlorine (See <https://www.hpsc.ie/a-z/lifestages/childcare> Appendix F on Chlorine Based Disinfectants).
- Rinse and dry the item thoroughly.
- I will follow the manufacturer's cleaning/disinfecting instructions and use recommended products to ensure effective usage and to ensure equipment is not damaged.

18. I will create a plan for dealing with myself or a child, becoming ill with symptoms of COVID-19.

- I will have a small supply of surgical masks in a readily accessible place for use if someone develops symptoms of COVID-19.
- If I or a child is in my home at the time that they feel unwell and develop symptoms, I will call my backup person and parents of the unwell child
- If a child, or I, develop any symptoms of acute respiratory infection including cough, fever, or shortness of breath during the childminding day, I will keep my distance or the child at a distance from the other children until my backup persons arrive. I will then remove myself or take the child to a designated area where the child can be isolated and attended to and stay with the child until the parent arrives. My backup person will stay with the remaining children until their parents collect them.
- In an emergency, I will call the ambulance, and explain that the child is unwell with symptoms of COVID-19.
- The room will be cleaned and contact surfaces disinfected once they leave.
- If the affected person needs to use the bathroom whilst waiting for medical assistance, they will use a separate bathroom if available and it will be cleaned and contact surfaces disinfected before use by others.

19. I will follow HPSC guidelines if there is a suspected or confirmed case of COVID-19 in my home, which are:

- All individuals with symptoms of COVID-19 should contact their GP for further advice.
- If the doctor arranges testing for them, they (or their parent) will be contacted by Public Health to identify anyone who has been in contact with them during the period when they were likely to have been infectious.
- The childcare setting will then be contacted by local Public Health staff of the HSE to discuss the case, identify people who have been in contact with them and advise on any actions or precautions that should be taken.
- An assessment of each childcare setting where this may occur will be undertaken by HSE public health staff.
- Advice on the management of children and staff who came into contact with the case will be based on this assessment.
- The HSE Public Health staff will also be in contact individually with anyone who has been in contact with the case to provide them with appropriate advice.
- Symptomatic people should self-isolate and arrange to get tested for COVID-19.

- Confirmed COVID-19 cases should continue to self-isolate at home for a minimum of 14 days and should not return to the childcare setting until they are advised that it is safe to do so.
- Close contacts of a confirmed case should go home and restrict their movements for 14 days. They should not attend the childcare facility during that time. They will be offered testing for COVID-19 and will need to stay away from the childcare centre for 14 days even if the virus is not detected on the tests. This is because some people who are infected do not have a positive test at the time the test was taken.

20. I will follow the [HPSC advice on how to clean my childminding settings](#) where myself or the children had suspected or confirmed COVID-19
